

GLASSBOARD INSTALLATION MANUAL

Part	Drawing	Description	Qty
P-1		Glass Board	1 EA

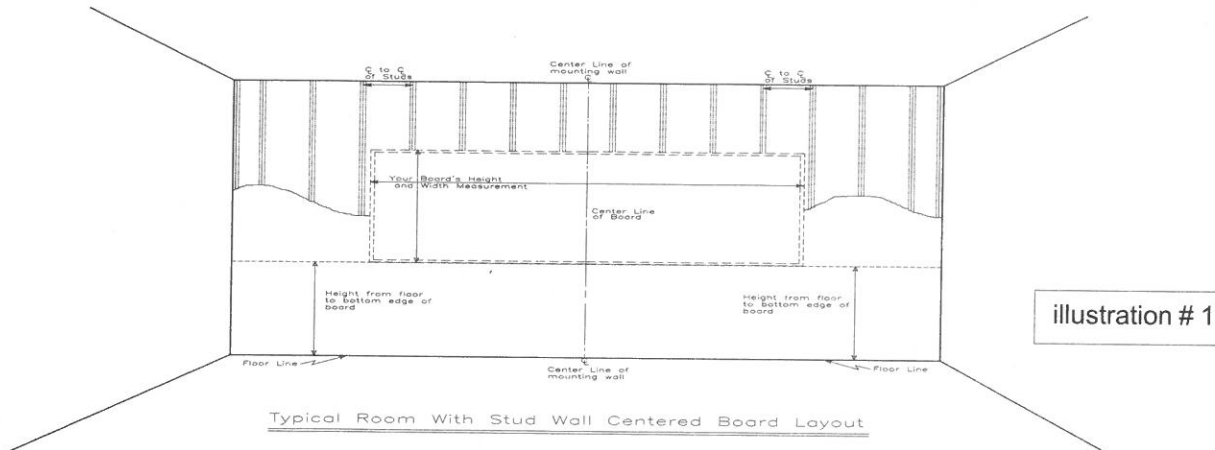

Hardware List

A		Z Bar	See Chart
B		Screws-Wall Mount	See Chart
C		Plastic Anchor	See Chart

Board Size	CHART (QNTY)
60 x 90 cm	(2) A-55cm Z Bar (4) B-Screws (4) C-Plastic Anchor
90 x 120cm	(2) A-85cm Z Bar (4) B-Screws (4) C-Plastic Anchor
120x150cm	(2) A-116cm Z Bar (6) B-Screws (6) C-Plastic Anchor
120x200cm	(2)A-170cm Z Bar (6) B-Screws (6) C-Plastic Anchor

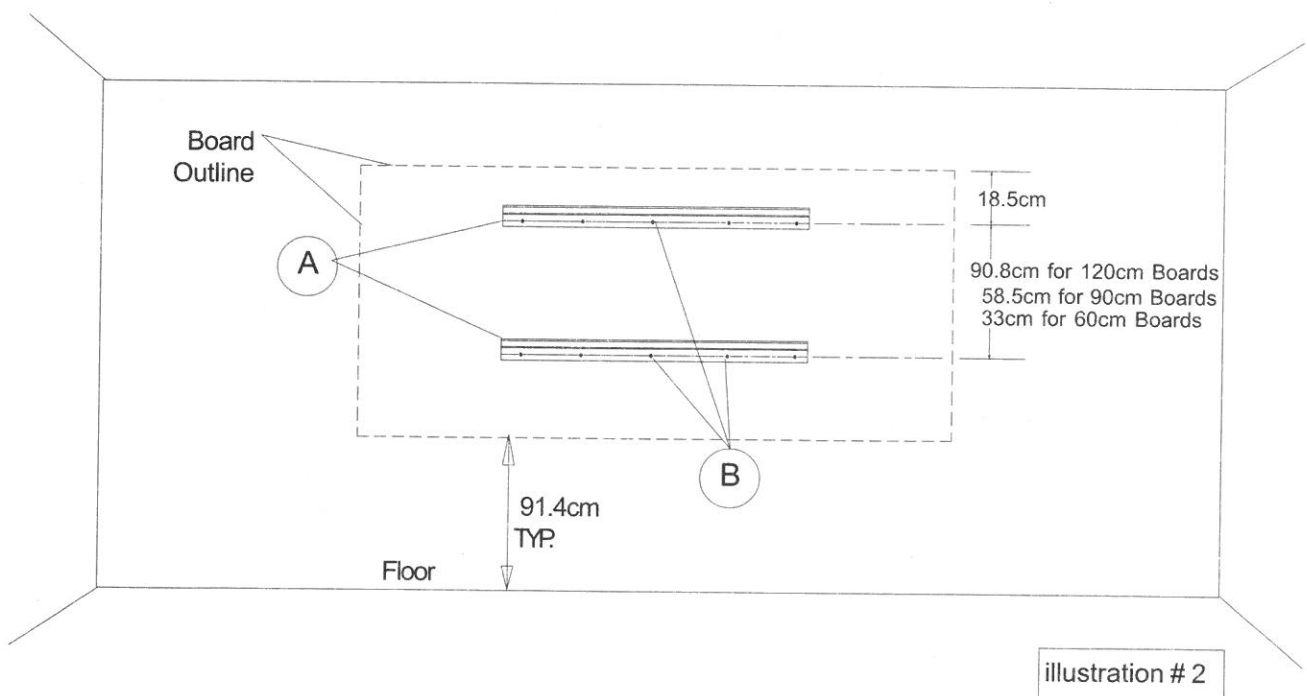

Preparing to Install Your New Glass Board

Measure the length, width and center lines of your new board. Determine the wall center line and height off the floor that you want your new board to be located. Hold your board up in position and draw a line above the top edge of your board and below the bottom edge of your board. Make sure these new drawn lines are parallel with the ceiling and floor lines on your mounting wall. If your wall has studs, determine the centerline of the studs. It is recommended that you tie into as many studs as possible when mounting your board.

NOTE: The proper installation of your board will require at least two people.
 Tools required: Tape measure, chalkline, electric drill / screwdriver, drill and screwdriver bits, stud finder and level.

1. Draw a line parallel with the top line of your board 7 1/4" below it. This line will be the mount hole locations for the top Z Hanger (A). Use Screws (B) to attach the Z Hanger, along with the correct anchors for your type wall. Drop down the correct distance for the mounting of the second Z Hanger that is listed in illustration #2. This will be the location for the mounting holes of the second Z Hanger. Use Screws (B) to attach along with any anchors that may be needed.

2. Lift your Glass Board up and hook the Board's back hangers onto the Z Hangers installed on the wall. See illustration # 3.
